

M20 x-small

Profilo vetro singolo da 21 x 31 mm

M20x-small è il sistema parete più sottile della nostra produzione, ha dimensioni estremamente ridotte 21 x 31 mm, altrettanto forte nella tenuta rispetto al sistema M45, M20 x-small è indicato per chi ama l'essenzialità, un design minimalista per ambienti particolarmente luminosi. Il profilo M20x-small, può ospitare indifferentemente lastre di sicurezza 55.1 o 66.1.

Single glazed profile 21 x 31 mm

M20 x-small is the thinnest wall system in our range although it is just as strong as the M45 system, even with its extremely reduced dimensions of 21 x 31 mm. M20 x-small, with its minimalist design for well-lit spaces, is the right choice for those who love simplicity. The M20 x-small profile can be fitted with either 55.1 or 66.1 safety glass.
